

DESCRIPTION

PENEBAR™ SW-45 Rapid is a unique sealing compound designed to expand rapidly when exposed to moisture making it a self-healing joint material for construction joint applications.

RECOMMENDED FOR

Typical Applications for PENEBAR™ SW-45 Rapid include building foundations, slabs, retaining walls, storage tanks, and similar non-moving cold construction joints.

DIRECTIONS FOR USE

How to apply PENEBAR™ SW-45 Rapid on poured-in-place construction joints:

- 1) Apply PENEBAR™ PRIMER by using brush at a minimum of 4 mils (0.1mm) thick by 25 mm wide over the entire surface length to receive PENEBAR™ SW-45 Rapid. Allow it to dry for 10-15 min at a temperature of 77°F (25°C) or where the temperatures are low, allow it dry for longer time.
- 2) By using the heel of the hand and moderate pressure, press a bead of PENEBAR™ SW-45 Rapid firmly into position on the standing structure. Make sure the product has bonded with the primed area.
- 3) Where required, splice ends to form a continuous, uninterrupted seal. For best results, cut each end at opposite 45° angles and tightly butt ends together. **DO NOT OVERLAP ENDS.** Gently knead the spliced ends creating an uninterrupted seal.
- 4) Peel the protective covering from the exposed side of the installed PENEBAR™ SW-45 Rapid.
- 5) Follow standard concrete placing procedures from here onwards.

NOTES:

- ▶ Always use PENEBAR™ PRIMER to avoid displacement of the PENEBAR™ SW-45 Rapid during concrete pouring. It may be necessary to utilize masonry nails or other mechanical means to hold the sealant in place on vertical surfaces.
- ▶ Place PENEBAR™ SW-45 Rapid so that it is no closer than 5 cm (2") from the outer surface of poured structure. If a Keyway is utilized, place the PENEBAR™ SW-45 Rapid into the bottom of the formed Keyway area.

RATE OF RAPID EXPANSION

Freshwater Exposure Results:

24 hours	140% expansion	Visible signs of cracking along edges of specimen.
48 hours	175% expansion	Splitting along sides of specimen. Both ends opening up like a flower.
72 hours	190% expansion	More pronounced splitting along sides and ends.
120 hours	210% expansion	Specimen's expansion became so great that further testing was impracticable.

Saltwater Exposure Results:

24 hours	107% expansion	No visible sign of deterioration
48 hours	112% expansion	No visible sign of deterioration
72 hours	114% expansion	No visible sign of deterioration
120 hours	118% expansion	No visible sign of deterioration

PHYSICAL PROPERTIES

DESCRIPTION	TEST METHOD	PENEBAR™ SW-45 Rapid
Color	-	Black
Specific Gravity	ASTM D71	1.50 ± 0.05
Volatile Matter	ASTM D6	1% max.
Penetration, 150 g cone @ 25°C (77°F); 5 sec	ASTM D217	40 ± 5 mm

Application Temperature Range: -23°C to 38°C (-10°F to 100°F)

Service Temperature Range: -34°C to 82°C (-30°F to 180°F)

SPECIAL CONSIDERATIONS

- ▶ Always use PENEBAR™ PRIMER to ensure tight adhesion and to aid in preventing PENEBAR™ SW-45 Rapid from moving during the concrete pour. For vertical surfaces, nails may be used to hold the product in place in conjunction with PENEBAR™ PRIMER.
- ▶ PENEBAR™ SW-45 Rapid should be used at a minimum depth of 50 mm (2") inside the concrete.
- ▶ When used on pipes and other structural penetrations, PENEBAR™ SW-45 Rapid should be cut to measured length and placed around the penetration with ends butted.
- ▶ In all cases, PENEBAR™ SW-45 Rapid should be in direct contact with the substrate along the entire length of the installation.
- ▶ PENEBAR™ SW-45 Rapid is not an expansion joint sealant and only suitable for non-moving concrete joints.
- ▶ PENEBAR™ SW-45 Rapid should not be installed in standing water or on frozen or icy surfaces.

PACKAGING

Type A is packaged 30 meters/carton (6 rolls, 19 mm × 25mm × 5 m each).

Type B is packaged 24 meters/carton (6 rolls, 9 mm × 25 mm × 4 m each).

STORAGE / SHELF LIFE

When stored in a dry enclosed area off the ground at a minimum temperature of 7°C (45°F) in unopened, undamaged cartons, shelf life is unlimited.

SAFE HANDLING INFORMATION

Keep out of reach of children.

WARRANTY
